**BIOBAC  
MOUSSE**

**KITCHEN**

**ACTION**

- Biotreats

## **INNOVATIVE:**

- Ultra-compact expanding foam for easy removal of animal and vegetable fats from drain lines.
- Breaks down fats/grease collected around the first 20 to 30 centimetres = Main source of odour build-up in the kitchen.
- Reinforced action on vertical walls thanks to the exceptional resistance of the foam. No running.
- Its biosurfactant formula liquefies fats/grease, breaking them down in the grease tray.

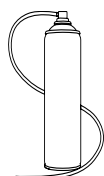

## **PROTECTS:**

- Prevents the risk of blocking, clogging and odour build-up.
- Mixture of bacteria and biosurfactants that are completely inert for all siphons, pipes and drains.

## **ADVICE:**

- Ideal for breaking down fat in kitchen gutters, siphons, grease tray drains, dish-washing sinks, etc.
- Includes a long format extension tube to treat hard-to-access areas within drain lines.
- Used with BIOBAC for a complete treatment of the grease tray.

## **PACKAGING:**

Aerosol  
with extension tube  
750 ml

## **INSTRUCTIONS FOR USE:**

- Use at the end of each service (after cleaning surfaces and floors) in all kitchen siphons and drains.
- Shake the aerosol.
- Spray directly into kitchen siphons, gutters, grease tray drains, sink plugholes, dish-washing sinks...

## **PROPERTIES:**

- \*Complex of biosurfactants and micro-organisms specially selected for their action against organic deposits. This is not an organic farming product.
- Physical state: Liquid.
- Appearance: Foam.
- Colour: light yellow.
- Density: 1.03.
- VOC: 20.2 %.

## **WITH THIS PRODUCT, IPC OFFERS YOU:**

- BIOBAC
